Andrei joined our team in a contract position from May 2017.

During his time at Purepoint, Andrei became a reliable member of the team and his co-workers spoke fondly of him. He joined during a particularly hectic time and was able to slot straight into the team and pick up frontend development tickets on a large and complex Ruby project.

Andrei also learned a lot during his time working at Purepoint. He took part in an agile development team, received Scrum training, and had an opportunity to learn about client/agency relationship dynamics. He engaged in meaningful debate with the other team members and was willing to help others pick up tasks when they had too much work of their own.

Andrei was always reliable and never missed work.

Overall I see no reason not to recommend Andrei to future employers.

Freddie Smith

Director, Purepoint
